## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 2, 5 and 12-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification and drawings do not describe that "the selection signals is determined in accordance with the **scrambled** subset of bits." The specification only teach that, for example, page 17, lines 11-23, "In accordance with the subset of information bits, control processor 522 provides a code channel selection signal to Walsh symbol generator 508 and provides a frequency selection signal to variable frequency synthesizer 516." The subset of information bits is used for the selection instead of the **scrambled** subset of bits.
